Description

The DW- SFP10G 80- xx- I transceiver is designed to transmit and receive serial optical data over single mode optical fiber with 80Km. Thetransceivers are compliant with SFF-8431, SFF-8472, and 10GBASE-ZR/ZW. The transmitter converts serial CML electrical data into serial optical data compliant with the IEEE 802.3ae standard. The receiver converts serial optical data into serial CML electrical data. Digital diagnostics functions are available via a 2-wire serial interface, as specified in SFF-8472.
