NEOCLEAN-S Fiber Optic Cleaning Sticks

Fiber sticks are the ideal consumable for cleaning 1.25/2.5mm connectors. The 1.25/2.5mm cleaning stick is made of polyester, and polyurethane and the handle material is polypropylene of high quality, and the antistatic materials and superfine fibers are used. They can be used to clean the end faces of installed connectors, from inside the enclosure. Cleaning is achieved by inserting the microfiber tip inside the adapter's aperture and twisting once. Or being used to cleaning fiber connectors, just lightly press or wipe, and you can complete the cleaning.

The microfiber material allows the user to clean installed connector end faces without scratching the surface and ensures a perfect clean the first time. The length of the supporting stick can be shortened, flexibly choosing according to the usage scenario.
